Profile

Game Developer with hands-on experience in online multiplayer and mobile games. Strong background in C# and Unity, delivering gameplay systems, UI integrations, and collaborative development within agile environments.

Professional Experience

Game Developer Intern, *Gamearound* — 2024 – 2025, Remote

I worked on online multiplayer mobile games within a small agile team using C# and Unity, contributing to a commercially released kart racing title.

- Designed and refined core gameplay systems and mechanics.
- Implemented UI and backend integration for in-game store features using C# and Azure.
- Improved kart handling, VFX, and power-up systems for production readiness.
- Resolved bugs, optimized performance, and collaborated through Git-based workflows.

Education

Bachelor - Computer Games Programming, *Universidade Lusófona*
2022 – Present | Lisbon, Portugal

Bachelor's degree focused on software engineering fundamentals and real-time systems, with strong emphasis on practical implementation, technical problem solving, and collaborative academic projects.

- Covered artificial intelligence, networking, and client-server architecture concepts.
- Developed technical and gameplay-focused academic projects.
- Applied agile methodologies (Scrum/Kanban) in team-based development.
- Used C#, C++, Python, MySQL, Arduino, and Git in practical projects.
- Implemented object-oriented programming principles and design patterns.
