Dear Hiring Manager at CD Projekt Red,

I am writing to express my interest in joining CD Projekt Red as a Junior Developer. I am particularly drawn to your studio's commitment to narrative depth, player-driven experiences, and the level of gameplay depth seen in titles like The Witcher series and Cyberpunk 2077.

I am a **Junior Developer with 1 year of professional experience** in game development and around three years working with C# and Unity. During my time at Gamearound, I contributed remotely to an online multiplayer project, Mad Kart Racing (mobile). My responsibilities included implementing gameplay features, refining UI elements, and resolving bugs, which strengthened both my technical foundation and my ability to collaborate within a team.

I hold a **Bachelor's degree in Game Development** from **Universidade Lusófona**, where I developed a solid foundation in computer science principles, gameplay systems, and software architecture. Throughout my studies, I worked on multiple game projects that strengthened my skills in C#, Unity, and problem-solving, while also reinforcing good coding practices and collaborative development.

I am comfortable adapting to new tools and workflows, particularly in agile environments. I value clean, maintainable code and enjoy working closely with designers and artists to create cohesive gameplay experiences. I am especially motivated by projects that combine strong mechanics with immersive worlds, something CD Projekt Red consistently delivers.

I am seeking an opportunity to grow as a developer, contribute to ambitious and meaningful projects, and continue refining both my technical and creative skills within a team that shares the same level of passion for games.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how I can contribute to your team.

Best regards,
João Neto
